Press release ROLF SCHLICHT GmbH

Improved service for **RS POWDERTECH** & **RS MULTICUT**

For almost 60 years ROLF SCHLICHT GmbH has been developing, manufacturing and selling machines for the rubber, plastics and cable industry. Companies worldwide rely on products from the **RS POWDERTECH** & **RS MULTICUT** program.

To further improve our customer service for you, we decided to have an in-house technician for commissioning, maintenance and servicing of our machines.

With immediate effect, besides the proven sales and technical team, an in-house service technician from ROLF SCHLICHT GmbH will also be available.

Thus, we are in a position to react even better to the wishes of our customers and can respond more quickly and flexibly, even on short-term appointment allocations.

As in previous years, we continue to offer spare parts service for our machines, which are no longer in the current sales program. You will also receive spare parts for i. e. Talkomat, Talkator, RS80 etc. Not all spare parts are fully available, but we are happy to help you if you still want to keep your old machine in production.

For requests concerning commissioning, maintenance, servicing, overhauling or technical challenges, please contact us with confidence.
