Trade fair K 2019 and **RS MULTICUT** Next Generation Machines

Ladies and Gentlemen,

The K 2019 trade fair starts shortly and, as always, ROLF SCHLICHT GmbH will exhibit at booth A35 in hall 3 to present our new products and to hold interesting and exciting talks with you.

Besides the presentation of our new machine generations, brands „**RS POWDERTECH**“ and „**RS MULTICUT**“, this year we have another highlight for you.

Mr. Siegfried Deckert, founder of DCM Maschinenbau GmbH and managing director of DCA Deckert Anlagenbau GmbH, as our long-standing and highly valued production and development partner, as well as the technical managing director, Mr. Rainer Studtmann, will be available to you personally in the period from 17 to 23 October 2019 for discussions.

In 1996, ROLF SCHLICHT GmbH made the leap forward from the RS 80 to the PBA / RSC machine generation of the „**RS POWDERTECH**“ brand in close cooperation with Mr. Deckert.

In February 2019, we achieved a further leap in development, which results in the current RSC-NG. This machine has quickly become a bestseller and has already been sold worldwide.

The sale of well over 1,000 machines, since 1996 under the brand „**RS POWDERTECH**“, speaks for the lasting success of this synergetic partnership.

In the range of the brand „**RS MULTICUT**“ too, we have significant increases in the field of ease of maintenance and performance of the cutting machines in the recent past. We would like to refer here in particular to the OC-NG (**O**rbital **C**utter **N**ext **G**eneration), which we will introduce to you at the fair. It will replace the old OC generation of machines with a structurally improved cutting unit. This new generation will provide you, as a customer, with significant added value in terms of process stability and lower operation cost in your manufacturing processes.

Take the opportunity to get to know masters in the field of mechanical engineering in the extrusion line in person and arrange an appointment with Mr. Deckert or Mr. Studtmann and our sales team.

We are looking forward to meeting you!

Background Information Brands and Company: ROLF SCHLICHT GmbH - Quality & Competence since 1959

For nearly 60 years, ROLF SCHLICHT GmbH has been developing, manufacturing and selling machines for the rubber, plastics and cable industries.

With our machines and our sales representatives, we are your long-standing, competent partner for powdering and cutting solutions as well as for machines and equipment along the entire production chain.

Under the brand name „**RS POWDERTECH**“ the company ROLF SCHLICHT GmbH started in 1983 with the "Talkator" the first automated, dust-free solution for the powdering of profiles and cables with different powders by the founder Rolf Schlicht. About the "Talkator", the "RS 80" and the "PBA / RSC" machines we are today at the latest (but certainly not last) machine generation, the RSC-NG arrived (ROLF SCHLICHT COATING RSC-NG XXX-2E to - 4E and RSC-NG XXX-2N to -4N).

Under the brand „**RS MULTICUT**“ ROLF SCHLICHT GmbH develops, manufactures and sells machines with various partners for the cutting of various materials and profiles in the extrusion sequence as well as necessary peripheral devices. (MC, OC, CC, TEM, TGM, TGT, RS NM guillotine and circular knife, caterpillars RB series and unloading systems).

60 years of experience in the market, excellent contacts in the industry and close, trusting cooperation with our customers and our country agents have contributed to the continuous improvement of our products.

Development and manufacturing partnerships, some of them lasting more than 40 years, ensure that ROLF SCHLICHT GmbH can offer high-quality products and competent solutions.
