Spare parts prices significantly reduced!

Dear customers,

We are pleased to inform you that we have reduced the spare part prices for the essential wear parts of the PBA and RSC machines by an average of 30% (!). Significant price reductions of up to 30% were also realized for the RSC Next Generation.

So we can e.g. offer gun parts, jet pump parts, filters etc. in the future at significantly more attractive prices.

This was made possible through purchasing cooperation with partners, purchase price negotiations with supplier partners and optimization of internal processes.

In the future we will offer you spare parts packages in three sizes, depending on your needs. There will be spare parts packages small, medium, large for all generations (PBA, RSC, RSC NG). The packages were adapted to the needs of our customers in day-to-day business.

Of course, these packages can also be purchased independently of a machine purchase.

Request your spare parts offer today.
